

THERMOPLASTIC SHEET AND ROD FOR TANK MANUFACTURING, SEMICONDUCTOR, CLEANROOM, MARINE, DISPLAY & OUTDOOR LIVING APPLICATIONS

- PE, PP, and PVC sheet, rod and welding rod for industrial applications
- FEP, PFA, ECTFE, PVDF, Co PP and HDPE standard and fabric-backed, corrosion-resistant sheet and roll stock
- FM4910 listed PFA, PVC, FRPP, ECTFE, PVDF and CPVC sheet, PVDF, PVC and ECTFE rods and welding rod for semiconductor manufacturing and cleanrooms
- UV-resistant HDPE sheet for interior and exterior signage as well as marine & weatherable applications
- HDPE and PP cutting boards for food-contact applications
- UV-resistant Polytone sheet for playgrounds and outdoor structures

THERMOPLASTIC ALLOY FILM AND SHEET

- For thermoforming, fabricating and membrane pressing of:
 - Aircraft Interior Components
 - Rail/Mass Transit Interior Components
 - Commercial/Industrial Components

CUSTOM EXTRUDER SPECIALIZING IN HIGHLY ENGINEERED THERMOFORMABLE SHEET

- ABS, Acrylic, PC/ABS blend and TPO for industrial applications including agriculture, heavy equipment, signage, recreational vehicles, medical and marine components
- Option of mono, co-extrusion, or tri-layered construction in both sheet or roll stock

UHMW-PE (ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE)

- Custom machined UHMW parts and extruded profiles
- Stock UHMW shapes including rod, tube, profiles and flat sheets
- Standard and specialty formulations

THE LEADERS IN POLYCARBONATE SHEET AND GLAZING SYSTEMS

- Policarb® and arcoPlus® lines of structural multiwall polycarbonate sheets are offered in a variety of widths, lengths, thicknesses, profile structures, colors and glazing options to satisfy all of your building and industrial needs

PREMIUM QUALITY EXTRUDED PVC, POLYURETHANE AND LDPE TUBING

- Precision extruded for reliable, leak proof connections
- Offers a full range of regulatory compliance for food, beverage, dairy, pharmaceutical, biotechnology, and medical applications
- Sized from 1/6" to 3" ID

50 Years

Representing You...

Increasing your profits with high performance plastics, technical expertise and marketing know how

Established in 1973, CartierWilson provides thermoformers, fabricators and distributors of plastic products with a broad variety of top-performance, competitively priced materials produced by world-leading manufacturers. In addition, CartierWilson provides expert advice in applying these materials in ways that improve the performance of your products while reducing your material costs and processing times.

With in-depth knowledge of all aspects of your business, CartierWilson can also assist you in marketing of your services, and help you expand your capabilities to take advantage of today's fast-growing markets such as thermoformed aircraft interior components, medical equipment and building products.

In addition to representing the world's leading manufacturers of plastics and related products, CartierWilson offers a comprehensive range of services to ensure your total success and increase your profits - from expert assistance in specifying your plastic and related materials to marketing of your finished goods for the highest possible profit, and everything in between - all at no additional cost or obligation.

SERVICES WE PROVIDE

- Education & Training of Distribution Sales Force
- Distribution of Sales & Marketing Materials
- Specification Selling
- Trade Shows
- New Product Development
- Thermoforming, Fabricating & Machining Guidance
- Government Contracts
- Marketing Research & Competitive Analysis
- Joint Calls
- Field Sales & Marketing
- Lead Generation
- Market Development
